LOOKING BACK ON 2004:
A MESSAGE FROM THOMAS KIRK,
PRESIDENT & CEO OF Us TOO INTERNATIONAL

As President and CEO of Us TOO International, I am pleased to present Us TOO’s first annual report.

I view 2004 as a year of transition and growth for Us TOO International. I was proud to assume the position of President and CEO in November 2004, following former President and CEO, John Page, whom I want to thank for his tireless efforts on behalf of the organization.

I also want to thank Lew Musgrove, who wrapped up his third term as Chairman of the Us TOO International Board of Directors at the end of 2004. Lew will continue to serve as an active Us TOO Regional Director and member of the Advocacy Committee, and I look forward to working with Lew in 2005.

A special thanks also goes to the many other dedicated volunteers whose hard work and ongoing commitment to Us TOO International helped us to have a productive 2004.

Major milestones during 2004 included:

- NexCura gifting Prostate Pointers to Us TOO, providing assurance that these virtual support and education services continue in the years to come

- The CDC-funded Minority and Underserved Populations Prostate Cancer Awareness and Early Detection Program successfully completing its first year in the fall of 2004, recruiting new volunteers, reaching 10,000 people in underserved communities and expanding to 14 pilot site locations including Washington, D.C. in its second year of operation

- Us TOO publishing and distributing to chapters a new educational brochure, “What You Need to Know for Better Bone Health”

- Results from the 2003 Us TOO/NexCura cancer patient satisfaction survey being presented at the American Society of Therapeutic Radiology and Oncology’s 46th Annual Meeting

- The Circles of Love: Families and Companions Program moving from conception to implementation upon receiving its initial financial support

- A new 2004-2007 Strategic Plan being developed by the Board of Directors.

As Us TOO proudly celebrates its 15th anniversary in 2005, I look forward to working closely with our new Chairman of the Board, Jim Kiefert, our many volunteers, and our dedicated staff to help educate and provide support to prostate cancer patients, their companions and families.

Sincerely,
Thomas Kirk,
Us TOO President & Chief Executive Officer
A CONVERSATION WITH LEW MUSGROVE,
Us TOO INTERNATIONAL
2004 CHAIRMAN OF THE BOARD

Us TOO talked to Lew Musgrove, Us TOO 2004 Chairman of the Board, about:

- the highlights of 2004
- his involvement with the organization
- his hopes for the future of Us TOO International.

Lew was on the Us TOO Board of Directors for six years and served as Board Chair for three years. He is a 13-year prostate cancer survivor and lives in Las Vegas with his wife, Sue Ann.

Us TOO: Why did you become involved with Us TOO?

Lew Musgrove: The urologist who operated on me 11 years ago asked me to start an Us TOO chapter in Las Vegas. I felt like I owed my urologist and our Heavenly Father a whole lot, so I started a chapter 11 years ago. Today, we get about 50-80 people at a typical meeting.

Us TOO: What was the most rewarding part of being Us TOO Chairman of the Board in 2004?

Lew: Finding a new head of Us TOO. We are a survivor-oriented chapter-based organization, and to run an organization like ours, you need the right individual.

Us TOO: What were some of Us TOO’s achievements in 2004?

Lew: We were able to work together with various other prostate organizations for the good of the people we serve. Also, we’ve grown the number of Us TOO chapters, and have better accountability from those chapters.

Us TOO: Describe your current involvement with Us TOO and with the prostate cancer awareness movement.

Lew: I still go to chapter meetings, and I’m a Regional Director for Us TOO. I am involved with the California Prostate Cancer Coalition, and sit on the Board of the National Prostate Cancer Coalition. I am also active with the Southwest Oncology Group in San Antonio, a group that has a select trial of 40,000 men who are taking Vitamin E and Selenium.

Us TOO: Why is it important for you to be involved in these organizations?

Lew: When you can help somebody, it makes it worthwhile. I average about six telephone calls a month from men who have been diagnosed with prostate cancer; the American Cancer Society refers calls to me. Though I can’t give advice to men because I’m not a doctor, I ask these men questions and share my own experience with them. I also refer them to the Us TOO website.
Us TOO: Why do you think that Us TOO is such an important organization for men and their families?

Lew: Anyone who is a prostate cancer survivor needs a support group. No man needs to walk that path of survival alone. It’s hard enough to find out you have cancer, and it’s important to know there is hope and solutions.

Us TOO: What are your feelings about the future of Us TOO and what it needs to accomplish?

Lew: As the largest prostate cancer support organization in the world, we need to make a statement to men that they need to establish in their 40s a personal baseline PSA, and that the change in that number is more important then the number itself. We also need to get physicians to understand that concept.

Us TOO wants to thank Lew Musgrove, 2004 Chairman of the Board of Directors for his invaluable leadership and support of Us TOO International’s mission of having a positive impact upon the quality of life of men with prostate cancer through education, support and advocacy. Us TOO appreciates all of Lew’s hard work and dedication on behalf of the organization.

"I have been involved with US TOO since 1991 when I was part of one of the charter chapters at Walter Reed Army Medical Center. I will never forget one of our first meetings in early 1992 when Senator Bob Dole made a surprise appearance at our chapter meeting and brought along Senator Ted Stevens as his guest! Later both Senators & Us TOO survivors invited our entire group to the US Capitol for a special meeting that I will never forget. Over the years, I have learned so much from being involved with Us TOO survivors and it has made me a better prostate cancer doctor."

Judd W. Moul, M.D., F.A.C.S., Professor & Chief, Division of Urologic Surgery, Duke University Medical Center

Lew Musgrove, on Us TOO

“(In 2004)...we were able to work together with various other prostate organizations for the good of the people we serve.”

“When you can help somebody, it makes it worthwhile.”

“Though I can’t give advice to men because I’m not a doctor, I ask them questions and share my own experience with them.”

“No man needs to walk that path of survival alone. It’s hard enough to find out you have cancer, and it’s important to know there is hope and solutions.”
CHAPTER NEWS

Us TOO has 325 chapters in 44 states in the United States and in 10 countries throughout the world. They function as independent chapters, forming a network under their parent group, Us TOO International, Inc. and committing to the Us TOO Mission:

"Communicate Timely, Personalized and Reliable Information Enabling Informed Choices Regarding Detection and Treatment of Prostate Cancer."

Each chapter holds regular meetings for men living with prostate cancer, as well as the families of prostate cancer patients. The meetings are free and open to all men, their friends, families and healthcare professionals who are interested in prostate cancer support and education. They provide unbiased information from experts in areas related to prostate cancer, including surgery, radiation, medications, nutrition and psychological issues.

By accessing the Us TOO website, or by calling Us TOO headquarters, men, their families and healthcare professionals can obtain information about meeting times and places.

Us TOO chapters were involved in a variety of activities in 2004. These activities were highlighted in the monthly Us TOO International Chapter Leader Newsletters, but here are some 2004 highlights of the collaboration between the chapters and the central office:

• A national calendar of events was created, detailing chapter programs and activities taking place throughout the year. The calendar is listed on the Us TOO website.

• A chapter survey was conducted to analyze chapter needs for 2005 planning.

• Chapter websites have been developed offering meeting topics and local resources.

• Chapters share ‘best practices’ information, as well as information about local events, such as awareness marches, health symposiums, fundraising events, collaborative efforts with local church groups and hospitals, such as screening and state advocacy.

• Chapter locations booklets with current chapter information were developed and distributed with support of Bayer Healthcare.

• The second annual meeting of the volunteers serving as State Coordinators/Regional Directors, sponsored by Novartis Oncology, took place in Chicago during October 2004.

• A special thank you goes out to Les Winick for volunteering his time as the Chapter Leader Newsletter editor.

"I have learned men with prostate cancer will live longer and happier when they and their families are involved in the Us TOO chapters. Survivors and their companions receive, at no cost to them, EDUCATION, SUPPORT AND MONTHLY PUBLICATIONS. My role as a Regional Director is to understand the importance of following the requirements of Us TOO's policies, supporting the needs of the men and women facilitating the Chapters, who are making it happen and saving lives in their towns and cities."

- Roland C. Young, Regional Director, South Carolina and Florida
CHAPTER PROFILES AND SUCESSES:
HANDS-ON SUPPORT, HANDS-ON HOPE

Us TOO Greater Quad Cities Prostate Cancer Support Group, Moline, Illinois
Facilitator: Bill Palos

- The chapter conducted numerous health fairs in the community. Two particularly large health fairs where held at the Rock Island Arsenal (over 1,200 participants) and one at the John Deere Harvester Division (over 800 participants.)

- Facilitator, Bill Palos, made presentations to local organizations, such as men’s & women’s organizations, Rotary, etc. Bill contacts and talks with over 2,000 men and women each year regarding the need for early detection of prostate cancer.

- The Moline chapter was able to join an already-established organization, the Quad Cities Marathon, to make the event a prostate cancer education and awareness event. The funds from the event are maintained locally for distribution to organizations to further prostate cancer education and awareness in the region. The local chapter collected over $16,000 to be distributed to organizations for conducting prostate cancer awareness efforts.

- The group established the blue auto magnet, "Know Your PSA," which is now available nationally.

Us TOO is involved in advocacy as never before! Chapter members now must do their part to enhance the national effort. We cannot rely on others to speak for us, the prostate cancer survivors. We need to mobilize the entire Us TOO community in order to obtain the resources necessary to win the battle against prostate cancer. Us TOO has assumed the lead to get our story to the public and acquire funding sources.

-Vin McDonald
Us TOO Advocacy Volunteer

Us TOO Hackensack University Medical Center
Co-chair, Joe Cavalli

- The Hackensack chapter started to reach out to the community to increase awareness and to inform the under-insured or those without insurance where they can get free to low cost screenings. To accomplish this, the chapter established relationships with the Bergen County Department of Health's CEED (Cancer Education and Early Detection) Coalition, The American Cancer Society Multi-Cultural Task Force for Bergen and Passaic Counties, and the Bergen County Partnership for Community Health.

- Through these groups, our support group made a presentation at the First Bergen County Hispanic Health Fair, participated at a Health Fair sponsored by the Target Store in Hackensack, as well as a Health Fair sponsored by Gilda's House of Hackensack.

- Additionally, the group participated in the planning and execution of the week-long screening program run by Hackensack University Medical Center during the week of Father's Day.
PATIENT FOCUS, PATIENT SUPPORT
BY THE NUMBERS

PROSTATE CANCER SUPPORT HOTLINE

In 2004, Us TOO received 3,556 calls to the prostate cancer support line. Those who called had a variety of questions and concerns, such as:

- newly diagnosed
- experiencing recurrence
- experiencing intimacy issues
- someone who simply needed to be heard
- patients and partners experiencing issues with impotency
- Commonly asked questions include: Do all men have the same side effects after treatment? What are the chances that I will be lucky and not have those side effects?

With calm, clear information and care, Us TOO volunteers and the patient support representative put their mind at ease and direct them to someone who could provide information and emotional support.

These are just a few of the grateful responses from callers:

- “I learned more from you than from my doctor.”
- “You took more time to answer my questions than my doctor.”
- “May I call back again with more questions?”

“Sometimes men don’t know where to begin, so I’ll ask them questions, like ‘what’s your PSA? Gleason grade? Staging? Age?’ Then they usually start to open up with their questions.”

“I think the thing most callers are grateful for is that they are taking with a live person, someone who will listen to them and is sympathetic to their problems. I always know that I have been successful with a caller when, as they hang up, they ask God to bless me for the work I do. That one thought makes my whole day.”

- Jackie Konieczka
  Us TOO Patient Support Representative

RESOURCE KIT FOR MAKING PROSTATE CANCER DECISIONS

In 2004, Us TOO distributed 699 informational kits to chapters and individuals, called Resource Kits For Making Prostate Cancer Decisions. This kit is a collection of quality and reliable information sources designed to help newly diagnosed men and their loved ones navigate the complex decision making process.

Contents of the Resource Kits For Making Prostate Cancer Decisions, available at www.ustoo.org or by calling (800) 80-UsTOO,
Since its early years, Us TOO has had a desire to reach those at high risk and in underserved populations. During 2003, Us TOO was fortunate to be awarded a cooperative agreement grant from the Federal Centers for Disease Control and Prevention (CDC) which enabled Us TOO to dramatically move forward in implementing program services for men at risk. The program is an integral part of CDC’s National Strategies for the Prevention, Early Detection or Survivorship of Cancer In Underserved Populations Initiative.

In 2004, the first pilot site locations included:
- Louisiana
- Texas
- Mississippi
- West Virginia

These were selected to target states with the highest incidence of mortality rates in the country. By the end of the year, plans were in place to expand to 14 pilot site locations, adding Maryland, the District of Columbia, Alabama, North Carolina, South Carolina, Georgia, Virginia, South Dakota, Arizona and Illinois.

Us TOO is striving to reduce the high mortality rate among minorities, and in underserved communities experiencing high incidence of prostate cancer. This outreach program is designed to increase awareness about prostate cancer in:
- African-American men
- Men who live in medically underserved regions of the US, including rural areas, as well as uninsured Americans
- Hispanic and other Spanish-speaking men
- Men in states with the greatest prostate cancer incidence rates per 100,000 populations
- Native Americans & Alaskan Natives.

The program’s major accomplishments for the first program year include:
- Distributed more than 145,000 pieces of prostate cancer awareness material to selected populations to educate them on the risks associated with prostate cancer
- Produced "educational encounters" with 10,891 people
- Developed new culturally sensitive Native American printed material
- Developed relationships with 70 new organization partners.
Us TOO EXPANDS ONLINE VIRTUAL SERVICES WITH PROSTATE POINTERS

In April 2004, Seattle-based NexCura, Inc., a healthcare education and information company for patients, caregivers and providers, donated its Prostate Pointers web resource to Us TOO International.

Prostate Pointers features 13 focused and moderated mailing lists on a variety of prostate cancer-related topics, and a collection of papers, reports and indices from other sites which contain information about the diagnosis and treatment of prostate cancer.

The popular Patient to Physician (P2P) resource on the website is a mailing list whereby patients can post their specific clinical questions with accompanying medical histories to physicians specializing in the field of prostate cancer. The physicians then respond with comments and information that the patients can take back and discuss with their own primary care physicians.

Other valuable resources include:

- The Circle, which provides a place for wives, families, friends, and significant others to share, cope and gain strength from each other
- treatment option-oriented lists such as RP (radical prostatectomy)
- SeedPods (brachytherapy)
- IceBalls (cryosurgery)
- HaH, which focuses on humor and healing.

Us TOO BETTER BONE HEALTH INITIATIVE

In 2004, Us TOO International launched a Bone Health Initiative, including design and completion of a new bone health brochure entitled, “What You Need to Know for Better Bone Health" with the support of Novartis Oncology. The brochure discusses the following topics, and can be requested from the office or found on the Us TOO website:

- The connection between prostate cancer and bone health
- The importance of maintaining bone strength
- What men can do to maintain healthy bones as they manage their prostate cancer
- How bone loss is treated and risk factors for bone loss
- Bone metastasis and advancing prostate cancer.

In 2004, planning and design was put in place for an international educational conference call on the topic of Bone Integrity, featuring a medical expert and two patient advocates. This program took place in January 2005. This initiative continues into 2005 based on planning and infrastructure put in place in 2004.
CIRCLES OF LOVE PROGRAM RECEIVES FIRST SUPPORT

Us TOO’s Circle of Love program, an education and support program for companions and families of prostate cancer patients, received its first funding in 2004, an unrestricted educational grant from Abbott Oncology.

The Circles of Love program is a resource and support program designed with companions and family members in mind. The purpose of the program is to acknowledge, empower and support companions, partners, spouses and family members of men with prostate cancer.

The Circles of Love program provides tools to deal with the following issues:

- The diagnosis of prostate cancer: How do companions and family members deal with a diagnosis and an overload of information?
- The treatment of prostate cancer: What is the role of companions and family members in treatment decisions and in their loved one’s course of treatment?
- Living with prostate cancer: How do companions and family members cope with the uncertainty and interruption in his or her life?
- Recovery: How do patients, companions and family members return to “normal” after prostate cancer?
- Advanced disease: How do patients, companions and family members make decisions about palliative and hospice care? How do you make peace with the potential outcome?

NEW 2004-2007 STRATEGIC PLAN

The Us TOO Board of Directors met in mid-2004 and developed a “Strategic Plan for 2007.” The Board examined progress to date, gathered the diverse views of Us TOO Board members and stakeholders, recommitted to the mission, formulated a clear organizational purpose, and created a set of 2007 goals, with specific strategic actions to achieve these goals.

The Us TOO Board of Directors then formulated the following “definition of success,” to be achieved by the organization by 2007:

- Us TOO is “The” nationally recognized Prostate Cancer organization for support, education, awareness and advocacy
- Highly effective and active Us TOO Chapters are growing in all 50 states, leading to Chapters in other major population centers in the world
- Us TOO produces and effectively distributes 100% more patient education materials for use by Chapters.
- Us TOO is accepted by the medical community, and support is evidenced by active Medical Advisors.
- Diverse and stable financial resources are ample to fully fund programs and services.
Us TOO STUDY EXPLORES RELATIONSHIP BETWEEN INCOME & PROSTATE CANCER PATIENTS’ TREATMENT OPTIONS, SATISFACTION

There has been minimal research done on the treatment decision-making process and informational needs of prostate cancer patients and their loved ones. As a result, in September, 2003, Us TOO collaborated with NexCura, Inc. to conduct an online survey of 4,587 prostate cancer patients and their companions and family members about their experiences from diagnosis to outcomes and how those experiences might be improved. NexCura is a health care education and information company that offers patients, caregivers and providers decision option tools through the NexProfiler™ Treatment Option Tool for Prostate Cancer.

Highlighted results of the study were reported on October 5, 2004 at the American Society for Therapeutic Radiology and Oncology’s 46th annual meeting in Atlanta, showing that patients with higher incomes felt better informed about the disease, were more likely to seek a second opinion and were generally happier with their treatment decision. According to the survey, 95 percent of patients who earned $120,000 or more said they felt informed about prostate cancer in general compared to 69 percent of patients earning less than $20,000 per year.

Furthermore, survey results reported that prior to treatment, 79 percent of patients in the highest income bracket sought a second opinion versus 47 percent in the lowest income range. After treatment, 92 percent of patients making $120,000 or more said they would make the same treatment decision again, compared to 77 percent in the $20,000 or less range.

THE OUTDOOR CHANNEL PROMOTES PROSTATE CANCER AWARENESS

In early 2004, The Outdoor Channel, an Us TOO supporting partner, highlighted Us TOO International and prostate cancer awareness information in their First Quarter Program Guide. They featured a story entitled “Hunt of a Lifetime,” describing prostate cancer patient Howard Sheridan’s experiences with the disease when he was diagnosed at age 45. Sheridan is an avid outdoorsman, and served as the Us TOO/Outdoor Channel prostate cancer spokesperson during 2004.

An informational article “Q+A About Prostate Health” also appeared in the program guide, and both stories appear on The Outdoor Channel web site at www.outdoorchannel.com. The Outdoor Channel is a national television network featuring hunting, fishing, shooting and other programming appealing to traditional sportsmen of all ages, with a focus on activities that the entire family can enjoy in the great outdoors.
Us TOO BENEFIT AT TWIN CITIES’ PREVIEW PERFORMANCE OF “ANYTOWN”

In August, 2004, Minneapolis was the site of a national preview performance of ANYTOWN: Stories of America, and a benefit reception for Us TOO International. The show was created by prostate cancer survivor Danial Shapiro and his wife Joanie Smith, founders of Shapiro & Smith Dance Company, and features the music of Bruce Springsteen, his wife, Patti Scialfa, and E-Streeter Legend, Soozie Tyrell.

“ANYTOWN marks not only the most exciting collaboration of our careers, but also celebrates survival on a very personal level,” says Joanie. “Getting out of bed and going back into the studio has given extra purpose to our waking moments and shown us that our strength as artists has helped us in this fight for our lives.”

Danial says, “At the heart of ANYTOWN is the importance of family—the actual family you are born into and the family you create. Dancing to Soozie, Bruce and Patti’s music makes this project the thrill of a lifetime.”

The event celebrated the start of “PSA in the U.S.A.” an awareness program designed to highlight the importance for all men to seek early detection for prostate cancer via simple PSA blood testing. The benefit supporting Us TOO International immediately followed the show and featured educational materials, free PSA screening and one-of-a-kind items for auction, such as show posters signed by the artists, dinners, gift certificates and many other special items. The reception was sponsored by American Medical Systems.

L to R: Kelly Drummond Cawthon – Shapiro & Smith Dance company rehearsal director and performer; Danial Shapiro, Co-Founder, Shapiro & Smith Dance, co-creator of “ANYTOWN: Stories of America;” Matt Monarski, event sponsor, Sr. Global Product Manager, Male Continence, American Medical Systems; Joanie Smith, Co-Founder, Shapiro & Smith Dance, co-creator of “ANYTOWN: Stories of America;” Greg Coloian, event sponsor, Global Marketing & Communications Manager, Men’s Health, American Medical Systems; Pamela Barrett, Director of Development, Us TOO International.
Us TOO CORPORATE SPONSORS

Us TOO would like to extend a heartfelt thank you to the following organizations for their generosity and support. Corporate Sponsors of Grant and In-Kind Funding:

Abbott Laboratories  Centers for Disease Control and Prevention  Sanofi-Synthelabo Inc.
American Medical Systems  Dendreon  TAP Pharmaceutical Products Inc.
AstraZeneca  Genentech  Supporting Partner:
Bayer Healthcare  Nexcura  The Outdoor Channel

2004 Us TOO INTERNATIONAL BOARD OF DIRECTORS

Lew Musgrove, Chairman, Las Vegas, Nevada
Russ Gould, Vice Chairman, Des Plains, Illinois
Jo Ann Hardy, Secretary, Detroit, Michigan
James Kiefert, EdD, Treasurer, Olympia, Washington
Gregory Bielawski, Carol Stream, Illinois
Robert Fidoten, PhD, Pittsburgh, Pennsylvania
Tom Hiatt, Hilton, New York
Robert Hustead, MD, Wichita, Kansas
Don Lynam, PhD, Lexington, Kentucky
Danny Parker, PhD, Clarksville, Georgia
Harry Pinchot, Oxnard, California
Joe Piper, Houston, Texas
Jamal Rasheed, Desoto, Texas
Sharon Saquella, RN, Stevensville, Maryland
Charles Selden, Montclair, New Jersey

Directors Emeritus:
John De Boer, Founder, Elmhurst, Illinois
Ronald Fabrick, DDS, Mount Prospect, Illinois
Edward Kaps, Founder, Fountain Hills, Arizona
2004 Us TOO STAFF

Us TOO wants to recognize and thank President and CEO John A. Page, for his four and one-half years of hard work on behalf of Us TOO International. John left Us TOO in October 2004, and was instrumental in bringing about a widespread awareness of Us TOO and its objectives, as well as enhancing Us TOO’s ability to better serve men with prostate cancer, their families and men at risk. He worked tirelessly on behalf of Us TOO, and left a lasting, positive impression upon the organization.

Staff:

Thomas Kirk, President and CEO
Jackie Konieczka, Office Assistant
Pamela Barrett, Director of Development
Karen Bacher, Program Director
Craig Kurey, Director of Technology

Consultants:

Mary Beth Micucci, Chapter Coordinator
Gene Wheeler, Minority and Underserved Program Director
Elizabeth Cabalka, Project Coordinator

Us TOO VOLUNTEERS

Us TOO is an organization built by prostate cancer patients to serve and support prostate cancer patients and their families. Its programs and services are developed and implemented by volunteers.

Us TOO wants to thank all of its many volunteers who worked tirelessly to promote a better understanding of prostate cancer through various Us TOO activities in 2004. Their dedication and support are vitally important to Us TOO International, and Us TOO appreciates their ongoing commitment and hard work.

Us TOO volunteers work in a variety of areas including:

- outreach and awareness
- advocacy
- patient support
- fundraising
- clerical assistance
- national leadership positions.

Two groups deserve special mention, the State Coordinators, now called Regional Directors who volunteer to help support the support group and chapter volunteer leaders with advice and information, and the physicians who volunteer their time and advice as Us TOO Medical Advisors.

REPORT OF INDEPENDENT PUBLIC ACCOUNTANTS

Board of Directors
Us TOO International, Inc.
Downers Grove, Illinois

We have audited the accompanying statements of financial position of Us TOO International, Inc. as of December 31, 2004 and 2003 and the related statements of activities, functional expenses and cash flows for the years then ended. These financial statements are the responsibility of management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Us TOO International, Inc. as of December 31, 2004 and 2003 and the changes in its net assets and its cash flows for the years then ended in conformity with auditing standards generally accepted in the United States of America.
