

## July 2018

Topics for July Call – video presentations for group meetings from the Pathways event – they will be broken into topics!

- Videos from Seattle and the two upcoming meetings in New Jersey and Chicago will provide several months of quality up-to-date information for support group leaders to use at meetings, which fulfills one of the needs requested by the group leaders.
- Many of the group leaders on the July call had watched the video for group leaders in Seattle and found it very valuable and are extremely enthusiastic about all the tools we are providing for them. Even more significant and exciting is the camaraderie that is forming through the phone calls within the group.

Ideas for other projects to help support group leaders:

- Page on website where leaders can go to try to find speakers in their community. Chuck and Terri had a call with a few sponsors who like this idea and we will continue our discussion to create this resource. Chuck will start promoting to other pharma folks for potential sponsor opportunities.
- Create a brochure that talks specifically about the value of Us TOO Support Groups. Lee Hillstrom from the Appleton group has some good ideas and already worked on a brochure for his local community. We will pursue this project but not until mid November, after all major events are past.
