Greetings -

We're pleased to bring you some of the latest **Prostate Cancer News You Can Use**. Below is a list of article titles in addition to a link to the Us TOO web page that provides access to the content for each news article. We hope that you find the information to be helpful.

We were in Central Florida on Saturday, April 9, for a **Community Conversation on Prostate Cancer** at The Villages. It was great to see 140 people at this free educational event to learn from physicians and presentations about the importance of informed decision making for patients and caregivers specific to testing, active surveillance, and treatment options for all phases of prostate cancer – from an initial diagnosis to management of advancing disease. [CLICK HERE](#) for more information and stay tuned for details coming soon for our **next event in Columbus, OH, on Saturday, May 21**.

Join me in congratulating [Terri Likowski](#) on her recent **promotion to Program Director – Support Group Services!** Terri has been an integral member of the Us TOO team for 11 years. In her new role, she will continue to initiate new support groups and provide assistance to support group leaders while developing additional leader resources and collaboration on grassroots educational events like the Community Conversations.

The Centers for Medicare and Medicaid Services (CMS) wants to **impose a mandatory Part B payment experiment** that could burden both patients and providers by hindering access to high quality, high value care. Medicare Part B typically covers medications that are injected or infused under direct supervision of a health care provider, which includes infused chemotherapy medications for cancer. [CLICK HERE](#) to learn more about the proposed experiment; and [CLICK HERE](#) for a fast and simple way to tell Congress to stop the experiment.

The manufacturer of a prostate cancer medication is interested in understanding the **advanced prostate cancer patient and caregiver point of view** on product-related information; and supporting resources for men currently being treated with hormonal therapy (but not in combination with surgery, radiation, or brachytherapy). Selected

participants will be compensated at [\\$150 each for a phone interview that won't exceed 60 minutes](#). Participants' identities will not be shared with the manufacturer. Please contact David Leonard from PFC Research for further information at pfcresearch@verizon.net or [212-289-0087](tel:212-289-0087).

Finally, check out some of the prostate cancer news from Europe in the [March 2016 issue of Europa Uomo](#) newsletter. It serves as the voice of prostate cancer patients across Europe.

NEWS YOU CAN USE ARTICLES:

Headlines for this month's [Prostate Cancer News You Can Use](#) articles are as follows. Links to the full text of each article are available at: <http://www.ustooevents.org/site/R?i=mQHZgnGUbdyKezrYEZQHCw>
