Greetings,

Thanks to the response from prostate cancer advocates across the country, Senator Dick Durbin's [amendment to preserve funding for prostate cancer research was passed on June 7](#). It defeated Senator John McCain's National Defense Authorization Act (NDAA), which would have eliminated the Prostate Cancer Research Program and research funding for many other diseases included in the Congressionally Directed Medical Research Program (CDMRP) at the Department of Defense (DOD).

Patients and caregivers are needed over the next two weeks for a very [important study regarding advanced prostate cancer](#). An [incentive of \\$125](#) is being offered for a 60-minute interview conducted by phone with a computer and webcam (free webcam provided, if needed). [CLICK HERE](#) for required criteria and registration.

If you're downtown Detroit at noon on June 13, join Us TOO at the Spirit of Detroit statue for a [Blue Monday event to kick off Men's Health Week](#). We're teaming up with the Michigan Institute of Urology Men's Health Foundation, Bayer and baseball legend Ken Griffey Sr. to encourage men to speak up about an important health issue: advancing prostate cancer. Ken, the spokesman for Bayer's Men Who Speak Up campaign, is touring the country to share his prostate cancer experience and encourage men to speak up about the signs and symptoms of advancing prostate cancer.

The next [Us TOO Community Conversation on Prostate Cancer is set for Saturday, June 25, in Austin, Texas](#). Join the discussion about the importance of informed decision making for patients and caregivers specific to testing, active surveillance, treatment options for all phases of prostate cancer from an initial diagnosis to advancing disease, and management of side effects.
